

ABRAHAM GEBRESELLASSIE

Walnut Creek, CA 94596 • (951)-358-9382 • abrahamgebresellassie@gmail.com • in/abraham2323/

Summary

Devoted, punctual and a team player. Expertise in algorithms and problem solving skills.

Education

B.S: Computer Science, 06/2023
La Sierra University - Riverside, CA

High School Diploma Graduation: 06/2018
Monterey Bay Academy - La Selva Beach, CA

Skills

- C++
- Python
- JavaScript
- Linux
- HTML/CSS
- Embedded Systems
- Java
- Android studio

Projects

- **Self balancing robot** - Collaborated closely with the head of our computer science department professor on a self-balancing robot to simplify navigation within campus buildings for both visitors and new students. Utilized Arduino(C++) and Python, to give it the ability to detect voice commands and move forward, backward, left or right.
- **Notification android app(Java)** - Utilizing Firebase, I successfully generated tokens and dispatched notifications to the Android emulator, which received each notification in a timely and orderly fashion.

Professional Experience

IT Technician, 01/2020 to 03/2020

La Sierra University

- Strategically upgraded computer memory to boost processing speed and overall performance, resulting in optimized workstations and increased user satisfaction.
- Spearheaded the seamless implementation of antivirus software across multiple systems, ensuring robust protection against threats.
- Successfully integrated printers and scanners into the school's network infrastructure, facilitating secure ID card functionality.

Assistant Web Developer, 06/2016 to 08/2016

Justice For All

- Increased web traffic, created dynamic media sections and added social media plugins including Facebook and YouTube.
- Assisted web developers in improving organization's website usability by refining dropdown menus with HTML/CSS, enhancing user experience.
- Reviewed information and elements regularly on websites and pages for accuracy and functionality.

Classes Taken

- Introduction to computer science
- Introduction to computer science II
- Data structures
- Computer organization and assembly languages programing
- System and Network Program
- Software engineering
- System analysis
- Programing languages
- Mobile application development
- Embedded system design
- Computer architecture
